

Hiboost
Outdoor Directional
Antenna

Overview

The outdoor directional antenna is a compact directional antenna that should be painted toward the nearest cellular tower. It can cover 2G/3G/4G and WLAN systems for GSM, DCS, UMTS and LTE frequencies. With its high gain, the coverage range can be enlarged efficiently.

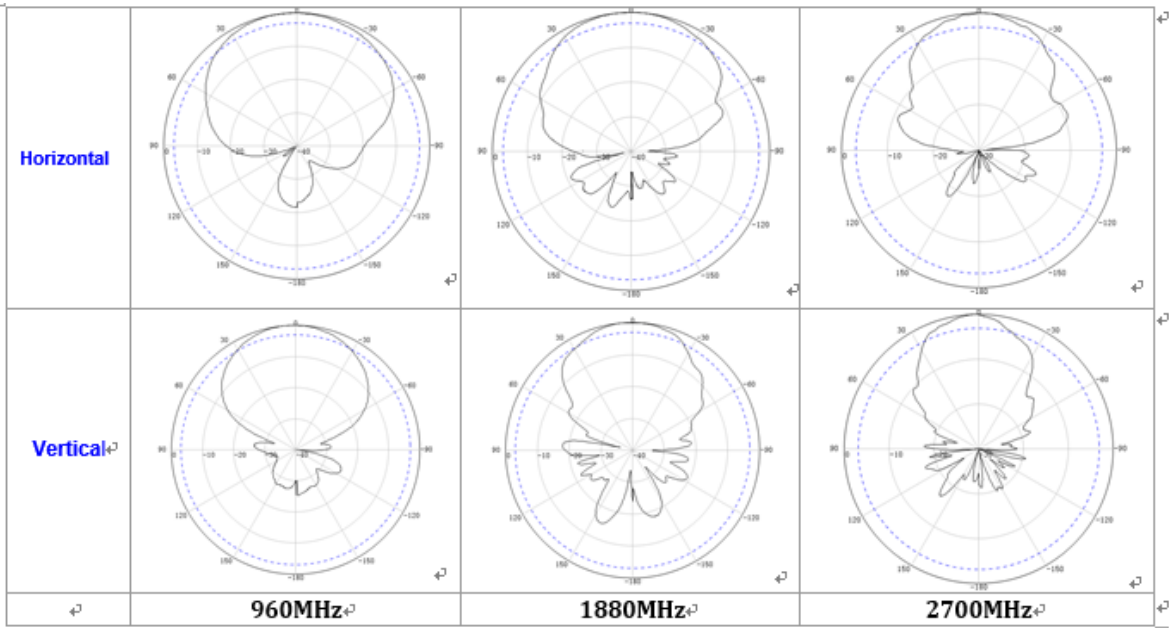

Key Features

- 698~960/1710-2700MHz Broad Band
- Wireless communications and data transmission system
- Indoor and outdoor directional coverage
- Low VSWR and return loss, stable performance
- Sealed with radome, strong protection ability

Specification

Item	
Frequency Range	698-960/1710-2700MHz
VSWR	$\leq 1.8/\leq 1.5$
Input Impedance	50 Ω
Polarization	Vertical/Horizontal
Gain	10dBi/11dBi
Horizontal Beamwidth	60°/55°
Vertical Beamwidth	65°/45°
Maximum Power	100W
Lighting Protection	DC Ground
Connection Type	N-Female
Weight	1Kg
Dimension	295*210*65mm
Color	White
